***Low-cost, highly functional international call conferencing.***

Call Conferencing is now easy, effective, secure and low cost. There is no excuse now for disparate team not to talk

Conference Call Manager allow people from all over the world to quickly easily and come together in a voice conference at very low cost.

- **Nine international countries supported in major cities** – only local calls required
- Conferences can be **recorded** for distribution as minutes
- Each caller's **attendance** is recorded
- **PIN** protection available
- Administrator can **view all incoming callers in real-time** and can mute or kick the caller off if required
  - Muting is useful if the background noise of the caller is disturbing the conference
- **Conferences** can be **on-hold** until the conference administrator joins
- Administrators can **out-dial** to an attendee from the webpage
- **Detailed reporting** is available on demand from the reports webpage
- **Authorised callers can SMS in to get a call back to a conference**
- **Skype** calls are **supported** providing free access to conferences
- The Administrator can see **real-time** who is attending the conference call
- From 5 to **20 simultaneous callers** can be supported
- Each user can have their own **Conference space**
